At the late meeting of the Bureau, its consent to the transfer was asked. THE GREAT QUESTION. The Richmond South has strong hopes of the success of the Lecompton Constitution in Congress,

notwithstanding the untoward fate of the measure thus far. That paper says: USTIMELY END OF THE COALITION.-If we may believe reports from Washington, the proverbial fruilty of coalitions is about to be signally illustrated by the rupture of the anti-Lecompton confeder

In Kansus a Convention is now sitting, and from its labors the Douglasites and Black Republicans were anticipating great results. No matter if it was called by an illegal Legislature. No matter though the act authorizing its session has been pronounced null and void by the Attorney General of the United Status. It was enough for the followers of Douglas if Kansas should present a competing Constitution to Congress, be it ever so unnatural and ricketty an abortion It sufficed for Seward that Kansas was not to be admitted as a slave State and he was content if the Lecempton instrument was rejected by Congress. Crittenden was only concerned to defeat the policy of the Administration and impair the prestige of the Democratic party.

In the midst of these high hopes, while the mem bers of the coalition are exulting over their recent victory, intelligence comes that the spurious convention in Kansas has bestowed the right of suffrage on foreigners and free negroes! Giddings is in to learn that the hig buck niggers, robust nigger restacies, but the other parties to the compact are disgusted beyond measure. THE Literary Attractions of the Bible.

AS A CLASSIC.

In the following pages it is proposed to present an outse of what may be called the incidental attractions of the Sible—to set forth its claims, both as a classic and as a book of general education. Regarded simply as a book of earning, of taste and genius, of history and elequence it has exerted an influence which cannot be too highly satimated, and commends itself to every cultivated understanding. It is the book of our learning, not less than or religion; the basis of our civilization, not less than our alvation. It has moulded into shape, it has quickened ate life, the whole body of our secular learning, as well as or theology; it has breathed its own vital spirit into all our science, literature, legislation, philosophy, and socia l and political institutions.

It is these attractions, which may be felt and appreciated even by the irreligious and worldly-minded, which we edge and a mixe of wisdom, a model of slequence, a maner-piece of poesy, a text book of instruction; and thus to ender It, so far as we shall be able, attractive to all.
